

Waters of the Universe

I felt the Universe and Earth
come together as one.

The mystical light of the stars had fallen
to Earth, captured by the still
pools of waters around us.

The animal spirits of the Earth
sipped from the sacred water of the stars.

Aho, the teaching of the Universe
had descended to the Earth
and was assisted by our
four legged, crawling & winged nations.

All brought their teachings,
according to how they walked the Earth.

The people gave them names as
they were worthy of being
relatives close to us.

So, forever the people would
be close to Spirit and
always have help on their
journey.

Aho, and it was good.
The Universe had not forgotten us.
